

PVC HCD Solid Woven

Solid Woven PVC black belts designed for economic belt solutions in high tear resistance areas where abrasion is not a major concern.

Key Features

- High tear strength
- Fully impregnated PVC carcass
- Permits small pulleys diameters
- Good fastener retention
- Stocked in three strengths 120, 200 & 350

Benefits

- The high tear strength is highly recommended for applications where belt ripping is a problem
- Less space is required and more savings can be made by using smaller pulleys
- Good belt endlessing can be achieved through quality fastener selection
