

Hose Safety Whip Checks

HCD Flow Technology is safety conscious and promotes the use of Whip Checks on all pressurised hose applications. To prevent serious injury due to hose or coupling failure, add a Whip Check at each hose connection and from equipment to hose. Install in the fully extended position (no slack) for proper safety assurance.

- Available in 3 sizes to work with hoses up to 4" inside diameters
- Available as hose-to-hose or hose-to-plant
- OSHA compliant
