

Dry Disconnect Couplings

Dry Disconnect Couplings are available in sizes from ¼" up to 6" and in a wide range of materials and seals to be the given choice for almost any application. This type of couplings are also known as **dry break couplings** or **dry break couplers**.

The self sealing design of the Dry disconnect couplings guarantees both the highest level of safety and also the quickest way of connecting and disconnecting.

Mann Tek has knowledge from design, production and marketing of DDCouplings® since 1977

DDCouplings®, Dry Disconnect Couplings, are designed for quick and spill free connection and disconnection of hoses and pipelines. They are used by producers of ink, adhesives, fatty acids, pharmaceuticals, liquid soaps, petroleum, chemicals, agricultural and a wide variety of caustic products and speciality acids.

Dry Disconnect Couplings can be found in a lot of various applications such as handling toxic chemicals, fuels etc. to transferring clean water, due to the wide range of materials, connections and sealing types Dry Disconnect Couplings are flexible enough to suit almost any application. The newest variant are LNG couplings (Cryogenic coupling)

DDCouplings® are especially needed in areas of zero tolerance spillage when your product:

- is of high value
- requires costly environmental methods of cleaning-up in case of spillage
- is expensive to reprocess or dispose of
- is hazardous to the environment
- can cause a health risk
- is prone to accidental spillage and product loss

DDCouplings® are in use in installations all over the world, especially where certification is a prerequisite and are certified by TÜV, Apragaz, Veritas, TDT, plus regionally required approvals.
